CodeYourFuture

At CodeYourFuture (a bootcamp), I completed various projects, including a full-stack project where I developed an application for identifying recyclable materials. This project utilised HTML, CSS, and JavaScript for the front end and Python, YOLOV8, Kaggle, Roboflow and Streamlit for the rubbish classification. The boot camp provided me with a robust foundation in web development, and I'm actively expanding my skills in this field.

PROJECTS

EcoScan

- I led front-end development for EcoScan, an application for identifying recyclable materials. Designed and implemented an intuitive UI using React, JavaScript, HTML, and CSS.
- Merged front-end expertise with a passion for sustainable tech. Additionally, I contributed to the project's AI development, with a self-taught foundation in AI technologies.

Animal-Farm

https://animal-farm.onrender.com

- I developed a calendar system for volunteers and workers to facilitate bookings. Utilizing React, JavaScript, HTML, and CSS.
- The system includes a user-friendly Booking Form and a dynamic Calendar, simplifying the booking process. On the server side, an Express application connects to a PostgreSQL database.

Video Collector

https://video-collector.onrender.com

- I developed the Video Collection App, a platform for users to explore and manage a collection of videos.
- I used React for front-end development, Node.js and Express for the backend, and PostgreSQL for the database, showcasing my full-stack development skills.

Supreme Autoglazing Website

https://supreme-autoglazing.onrender.com

- I am creating a user-friendly website for Supreme Autoglazing, a London-based windscreen and glass replacement company.
- The ongoing project emphasizes responsive design and intuitive navigation. I used React and HTML/CSS for the front-end development of the website.
- Some future changes will allow users to contact the company on the website and an updated design

WORK EXPERIENCE

Autoglass Windscreen Technician
Jan 2021 - Aug 2022
- Conducted customer repairs, windscreen replacements, and other glass-related tasks.
- Managed time efficiently and demonstrated proficiency in sales-related applications.

North Middlesex Hospital Senior Assistant Technical Officer
Jun 2021 - Sep 2021
- Prepared pharmaceutical products, including chemotherapy.
- Ensured aseptic unit cleanliness and compliance with COSHH and RIDDOR standards.
